PROJECTS

SEO Website – Pool Remodeling Company (Client Project)

Live Demo: <https://pacifiedgepools.com/>

Github: <https://github.com/mlanda98/pacific-pools.git>

- Designed and developed a local business website focused on pool remodeling and replastering services
 - Implemented **local SEO strategy** by creating city-specific pages targeting geographic keywords (Tracy, Sacramento, etc.)
 - Optimized **meta titles, descriptions, headings, and internal linking structure**
 - Built a “Get a Quote” **lead generation page** to convert visitors into customers
 - Deployed using Netlify with custom domain
 - Continuously improving site structure and fixing navigation issues to enhance UX and SEO performance
-

File Uploader – Full Stack (Node.js, Express, PostgreSQL, Supabase)

Github : <https://github.com/mlanda98/file-uploader>

- Developed a secure file upload system with authentication using Multer
 - Applied MVC architecture for scalability and maintainability
 - Built responsive UI using EJS and Tailwind
 - Deployed with Railway and PostgreSQL
-

Shopping Cart – Frontend (React, Vite, Tailwind)

Github: <https://github.com/mlanda98/shopping-cart>

- Built a responsive shopping interface with real-time cart updates
- Used React Router for SPA navigation and reusable components
- Focused on clean UI and user experience across devices
